

1. (Currently Amended) An appendage that is retrofittable to a prior art office chair comprising a seat supported by a central column and having a feet assembly attached thereto;

wherein said appendage comprises a chassis coupled to a seat connector and a monitor supporting structure;

said seat connector adapted to facilitating connection of said chassis to said central column of said office chair and said monitor support structure for supporting a computer monitor thereon.

**Please amend claim 5 as follows:**

5. (Currently Amended) The appendage of claim 1 wherein said chassis comprises a pair of tubular guide rails separated from each other by a fixed distance along a length of the pair of tubular guide rails.

**Please amend claim 6 as follows:**

6. (Currently Amended) The appendage of claim 4 wherein said means for varying comprises an attachment for attaching said monitor support structure to said chassis, said attachment being attachable to said chassis in a range of positions along the length of said chassis, allowing variation in position of a

computer monitor on said monitor support structure with respect to the eyes of a user seated on said chair.

**Please amend claim 7 as follows:**

7. (Currently Amended) The appendage of claim 4 wherein said means for varying comprises a compression drive for supporting and holding said monitor support structure.

**Please amend claim 9 as follows:**

9. (Currently Amended) The appendage of claim 4 wherein said means for varying comprises two pairs of auxiliary rollers affixed to said monitor support structure, enabling said monitor support structure to slide freely with respect to said chassis.

**Please amend claim 10 as follows:**

10. (Currently Amended) The appendage of claim 4 wherein said means for varying comprises said seat connector, being attachable to said chassis in a range of positions along length thereof.

**Please amend claim 12 as follows:**

12. (Currently Amended) The appendage of claim 4 wherein attached to said chassis there is provided at least one foot pedal for application of a force on said chassis for moving said chassis from a first position to a second position with respect to said office chair.

**Please cancel claims 14 and 15.**
